# Table of contents

**Chapter 1**  
Introduction  

**Chapter 2**  
Scope and aim of this thesis  

**Chapter 3**  
Ligand efficiency as a guide in fragment hit selection and optimization  

**Chapter 4**  
A medicinal chemistry perspective on melting point: matched molecular pair analysis of the effects of simple descriptors on the melting point of drug-like compounds  

**Chapter 5**  
Full combinatorial consensus scoring approach for ligand-based virtual fragment screening  

**Chapter 6**  
Mapping histamine H₄ receptor-ligand binding modes  

**Chapter 7**  
Combining quantum mechanical ligand conformation analysis and protein modeling to elucidate GPCR-ligand binding modes  

**Chapter 8**  
Summary, conclusions and perspectives  

**Samenvatting**  

**Acknowledgements**  

**Curriculum vitae**  

**Bibliography**
