Content

Chapter 1  Introduction, aim and outline of the thesis

Part I: Cervical length measurement in women with a multiple pregnancy

Chapter 2  Prediction of preterm birth in multiple pregnancies: Development of a multivariable prediction model including cervical length measurement at 16 to 20 weeks’ gestation

Chapter 3  Cervical length measurement for the prediction of preterm birth in symptomatic women with a twin pregnancy: a systematic review and meta-analysis.

Chapter 4  Mid-trimester cervical length as a risk indicator for caesarean delivery in women with a twin pregnancy

Part II: Triplet pregnancy and multifetal pregnancy reduction

Chapter 5  Prediction of time to delivery and timing of antenatal corticosteroids in women with a triplet pregnancy

Chapter 6  The effectiveness of multifetal pregnancy reduction in trichorionic triplet gestation

Chapter 7  Outcome of multifetal pregnancy reduction in women with a dichorionic triamniotic triplet pregnancy to a singleton pregnancy, review of literature and new data

Chapter 8  Pregnancy outcome after fetal reduction in women with a dichorionic twin pregnancy

Part III: General discussion and summary

Chapter 9  General discussion

Chapter 10  Summary/Samenvatting

Chapter 11  List of abbreviations, auteurslijst, dankwoord, cv
