Contents

1 Introduction and Summary

2 The fundamental ground tone vibration of H₂, HD and D₂ 7
   Published as J. Mol. Spectrosc. 300, 44, 2014
   2.1 Introduction 8
   2.2 Experiment 11
      Narrowband laser source 13
      Two-photon Doppler-free REMPI 14
      Discharge excitation 14
      Frequency calibration 15
      Ti:Sa cw-pulse frequency offset 15
      Assessment of systematic effects 16
      Uncertainty estimates 20
   2.3 Results 21
   2.4 Comparison to previous studies 25
   2.5 Testing QED and fifth forces 29
   2.6 Conclusion 32
   2.7 Acknowledgments 32

3 QED test in vibrationally-hot H₂ 33
   Published as J. Chem. Phys. (Comm) 143, 081102, 2015.
   3.1 Introduction 34
   3.2 Experiment 36
   3.3 Result and Discussion 38
   3.4 Conclusion 42

4 The A-X system of CO molecule to probe variation of μ 43
   Published as Phys. Rev. A 86, 022510, 2012
   4.1 Introduction 44
   4.2 Fourier transform spectroscopy 45
   4.3 UV laser spectroscopy 49
4.4 Sensitivity coefficients
4.5 Discussions
4.6 Conclusion
4.7 Acknowledgement

5 CO $A^{1}\Pi - X^{1}\Sigma^{+}$ (0,0) and (1,0) bands

5.1 Introduction
5.2 Experimental
   VUV-FT spectroscopy
   Two-photon laser study
5.3 Results
   VUV-FT data
   Two-photon laser data
   Level energies
5.4 Perturbation analysis
5.5 Conclusion
5.6 Acknowledgements

6 Laser Spectroscopy of CO A-X (2,0), (3,0) and (4,0) bands

6.1 Introduction
6.2 Experiment
6.3 Results and Discussion
   AC-Stark effect
   Frequency chirp in the PDA
   Uncertainty estimates and consistency
6.4 Conclusion
6.5 Acknowledgements

7 Perturbation analysis of CO A-X (2,0), (3,0) and (4,0) bands

7.1 Introduction
7.2 Experimental Details
7.3 Results
7.4 Perturbation analysis
7.5 Discussion and Conclusion
7.6 Acknowledgements

8 Hot spectra of CO and N$_2$

8.1 Introduction
8.2 Experimental 117
8.3 Absorption spectra of N\textsubscript{2} 119
   Temperature calibration 124
   Results 125
8.4 Absorption spectra of CO \textit{A}^{1}\textit{\Pi} – \textit{X}^{1}\textit{\Sigma^{+}} (0,0) and (1,0) bands 129
8.5 Conclusion 137
8.6 Acknowledgment 138

Bibliography 139

List of Publications 159

結論 161

Acknowledgements 163
