

Contents

Chapter 1:	General Introduction	7
Chapter 2:	Strain differences in presynaptic function: proteomics, ultrastructure and physiology of hippocampal synapses in DBA/2J and C57BL/6J mice	25
Chapter 3:	Migraine mutations impair hippocampal learning despite enhanced long-term potentiation	45
Chapter 4:	Severity of cognitive and behavioral impairments in mice with familial hemiplegic migraine type 1 mutations reflects corresponding human phenotypes	59
Chapter 5:	The hippocampal transcriptome in transgenic mouse models of hemiplegic migraine that carry mutant Cav2.1 channels	79
Chapter 6:	Mouse hippocampal transcriptome changes following fear memory retrieval	95
Chapter 7:	General Discussion	119
