

CONTENTS

1. General introduction.....	7
<i>Section I: Hip impairment following arthroplasty and the risk of falling</i>	
2. Risk of falling in older orthopedic patients after primary total hip and knee arthroplasty; a retrospective cohort study.....	25
<i>Section II: Mechanical requirements for mediolateral balance control</i>	
3. Effects of narrow base gait on mediolateral balance control in young and older adults.....	47
4. Effects of constrained trunk movement on frontal plane gait kinematics.....	59
<i>Section III: Hip abductor muscle function and mediolateral balance control</i>	
5. Reproducibility of a knee and hip proprioception test in healthy older adults.....	75
6. Hip abductor neuromuscular capacity: a limiting factor in mediolateral balance control in older adults?.....	91
7. Effects of hip abductor muscle fatigue on gait control and hip position sense in healthy older adults.....	115
8. The effects of hip abductor vibration on mediolateral balance control in standing and walking in older adults.....	133
9. Epilogue.....	161
Summary.....	181
Bibliography.....	187
Acknowledgements.....	205
List of publications.....	210
