

CONTENTS

Chapter 1	General introduction	8
Chapter 2	GeneBreak: detection of recurrent DNA copy number aberration-associated chromosomal breakpoints within genes <i>F1000 Research 2016; 5: 2340–2345</i>	20
Chapter 3	High Prevalence and Clinical Relevance of Genes Affected by Chromosomal Breaks in Colorectal Cancer <i>PLoS ONE 2015; 10(9): e0138141–14</i>	28
Chapter 4	Genomic profiling of stage II and III colon cancers reveals APC mutations to be associated with survival in stage III colon cancer patients <i>Accepted for publication in Oncotarget</i>	46
Chapter 5	Identification of 21 genes that are recurrently affected by chromosomal breaks and associated with colorectal adenoma-to-carcinoma progression <i>In preparation</i>	68
Chapter 6	MACROD2 expression predicts response to 5-FU-based chemotherapy in stage III colon cancer <i>Submitted</i>	74
Chapter 7	Summary and general discussion	102
Chapter 8	Nederlandse samenvatting	110
Chapter 9	Curriculum vitae	116
Chapter 10	Dankwoord	120
