

TABLE OF CONTENTS

Chapter 1	General introduction Thesis outline	7
Chapter 2	An oligonucleotide-directed mutagenesis screen to identify pathogenic <i>MSH2</i> DNA mismatch repair gene variants associated with Lynch syndrome	29
Chapter 3	Suspected Lynch syndrome associated <i>MSH6</i> variants: a functional assay to determine their pathogenicity	67
Chapter 4	A three-step site-directed mutagenesis screen identifies pathogenic <i>MLH1</i> DNA mismatch repair gene variants associated with Lynch syndrome	95
Chapter 5	Diagnosing Lynch syndrome: identification of pathogenic <i>MLH1</i> and <i>MSH2</i> variants in clinical practice	125
Chapter 6	Thesis summary General discussion	147
Appendix	Samenvatting Publications Dankwoord	159 163 164
