

Table of contents

Chapter 1	General introduction and outline of the thesis	11
Part I Pathophysiology and diagnosis of CIRCI		
Chapter 2	Diminished adrenal sensitivity to endogenous and exogenous adrenocorticotrophic hormone in critical illness: a prospective cohort study. <i>Crit Care. 2015;6:19:1</i>	25
Chapter 3	Steroidogenesis in the adrenal dysfunction of critical illness: impact of etomidate. <i>Crit Care. 2012;16:4:R121</i>	41
Chapter 4	Systematic review of 62 cases of adrenal haemorrhage and insufficiency: a potential mechanism of critical illness-associated adrenal dysfunction ? <i>Submitted</i>	59
Chapter 5	Assessing adrenal insufficiency of corticosteroid steroid secretion using free versus total cortisol levels in critical illness. <i>Intensive Care Med. 2011;37:12:1986-1993</i>	79
Chapter 6	Three calculations of free cortisol versus measured values in the critically ill. <i>Clin Biochem. 2015;48:1053-1058</i>	99
Part II CIRCI and corticosteroids		
Chapter 7	Should we abandon corticosteroids during septic shock? No. <i>Curr Opin in Crit Care. 2008;14:384-389</i>	117
Chapter 8	Critical illness related corticosteroid insufficiency. <i>Critical Care Medicine. Ed: S.R. Villar, in press</i>	129
Chapter 9	Summary and future perspectives	137
Chapter 10	Samenvatting	151
Appendices	Curriculum Vitae, publications, dankwoord	161
