

CONTENTS

Chapter 1	General introduction	9
Part 1: Development of a perioperative eHealth intervention		
Chapter 2	The effect of perioperative eHealth interventions on the postoperative course: a systematic review of randomised and non-randomised controlled trials. <i>PLOS One. 2016 Jul 6; 11(7): doi:10.1371/journal.pone.0158612</i>	21
Chapter 3	Using eHealth in perioperative care: a survey study investigating shortcomings in current perioperative care and possible future solutions. <i>BMC Surgery. 2017 May 23;17(1):61</i>	59
Chapter 4	A modified Delphi method towards multidisciplinary consensus on convalescence recommendations after abdominal surgery. <i>Surgical Endoscopy. 2016 Dec;30(12):5583-5595</i>	79
Part 2: Development of a study to evaluate a perioperative eHealth intervention		
Chapter 5	Assessing postoperative recovery by using an accelerometer; a proof of concept study. <i>BMC surgery. 2017 May; 17(1):56</i>	103
Chapter 6	Using PROMIS for measuring recovery after abdominal surgery : a pilot study. <i>BMC Health Services Research . 2018 Feb;18(1):128</i>	121
Chapter 7	Substitution of usual perioperative care by eHealth to enhance postoperative recovery in patients undergoing general surgical or gynecological procedures; study protocol of a randomized controlled trial. <i>JMIR Res Protoc. 2016 Dec 21;5(4):e245</i>	141

Part 3: Evaluation of a perioperative eHealth intervention

Chapter 8	Personalized perioperative care by eHealth after abdominal surgery measured by Patient Reported Outcome Measures (PROMs); a multicenter, single-blind, randomized, placebo-controlled trial <i>The Lancet. 2018 Jul 7;392(10141):51-59</i>	181
Chapter 9	Using eHealth in perioperative care aiming to improve return to normal activities after surgery; a cost-effectiveness analysis alongside a multicenter randomized clinical trial. <i>The Lancet. 2018 Jul 7;392(10141):51-59 - Appendix</i>	203
Chapter 10	A perioperative eHealth program to enhance postoperative recovery after abdominal surgery; process evaluation alongside a randomized controlled trial. <i>J Med Internet Res. 2018 Jan 2;20(1):e1</i>	225
Chapter 11	General Discussion Appendix 1: Implementation of an e-health intervention for patients undergoing abdominal surgery: which implementation strategy should be applied? Appendix 2: Implementation of an eHealth intervention for patients undergoing abdominal surgery: a study protocol of a qualitative study to explore barriers and facilitators for implementation	251
Chapter 12	English and Dutch summary	281
Chapter 13	List of co-authors List of publications Dankwoord Over de auteur	297
